

Machine Shop Staff

We are opening a new machine shop and seeking experienced and dedicated employees to staff the operations. The current openings are:

- CNC Programmer
- Machine Operator
- Job Set Up Specialist

Position Responsibilities

CNC Programmer

This position requires previous experience with all types of CNC turning and milling machines. Familiarity with design CAD/CAM software is required. Demonstrated ability to organize and manage multiple priorities using effective problem solving/resolution skills and a team focus.

Other duties of this position may include, but are not limited to:

- ❖ Determine the sequence of machine operations, select proper tools
- ❖ Analyze job orders, drawings, blueprints, specifications, and design data in order to calculate dimensions, tool selection, machine speeds, and feed rates
- ❖ Revise programs to eliminate errors, and re-test programs
- ❖ Determine reference points, machine cutting paths, and compute angular and linear dimensions, radii, and curvatures
- ❖ Observe machines on trial runs or conduct computer simulations to ensure that programs and machinery function properly and produce items that meet specifications.

Machine Operator

Previous CNC mill or lathe experience is required
Efficiently operate CNC and other machines per program requirements
Perform other machine shop duties

Job Set Up Specialist

Set up jobs for machine operations
Make sure materials are provided on time and where needed
Perform other machine shop duties

General Job Requirements for all three Positions

- Minimum high school diploma
- 3-5 years of machine shop experience
- Prior experience with aerospace parts is preferred
- Must have good work ethic, sense of personal drive/ambition
- Must have ability to work well with others

January 18, 2008
