AAMSI NAMES SCOTT CAMPBELL SENIOR VICE PRESIDENT, SALES & BUSINESS DEVELOPMENT

Fort Lauderdale, FL, November 30, 2016 – Associated Aircraft Manufacturing & Sales, Inc. (AAMSI), a global leader in the manufacturing and repair of military aviation products, has named defense aviation industry veteran Scott Campbell as Senior Vice President. Campbell will be responsible for Sales & Business Development for a newly formed business unit focused on servicing customers who operate Lockheed Martin platforms worldwide.

"Having someone with Scott Campbell's knowledge and experience in the global aviation industry join AAMSI will certainly strengthen our organization going forward" said AAMSI CEO Dennis Zalupski. "Throughout his career, Scott has built strong and effective teams that have always delivered on their commitments. We are very excited to have Scott as a member of the AAMSI team and we are confident that he will help us better serve the needs of our customers."

Campbell's career includes over 26 years in the aviation and aerospace industry where he has acquired extensive experience and market knowledge in engines, parts and repair services. Most recently he served as Senior Vice President for VAS Defense. Prior to that Campbell was Executive Vice President of Business Development and Sales for Kellstrom Defense Aerospace, a Merex Group Company. Campbell also led Kellstrom Defense Aerospace as its President, prior to its sale to Merex in 2014.

In his 13 years with Kellstrom, Campbell served in a variety of senior management positions, overseeing sales and marketing, purchasing and repairs of a variety of aircraft platform parts and services to both US and foreign military organizations. Prior to Kellstrom, Campbell served as Vice President of purchasing and materials for Fine Air/Arrow Air and as Vice President of purchasing, materials and repairs for Greenwich Air Services.

About AAMSI

Established in 1953, AAMSI (Associated Aircraft Manufacturing & Sales, Inc.) is a Small Business that has built a strong reputation within the global Aerospace and Defense Aviation Industries with its engineering, aerospace manufacturing, repair and logistics expertise for military avionics and airframe structural components. AAMSI is an established leader in the global market for IFF (Identification Friend or Foe) systems.

AAMSI is licensed by the Boeing Co. to manufacture thousands of structural airframe parts used on F-15, F/A-18 and CH-47 platforms. AAMSI is also licensed by Northrop Grumman Corporation to design, manufacture and/or repair a number of legacy electronic systems across a wide variety of military platforms. AAMSI also provides cables, boards, boxes, electronics design, manufacturing and repair of aerospace components and systems.

AAMSI has been a U.S. Department of Defense (DoD) Contractor since the mid-1970s, and is registered with the U.S. Government's Business Partner Network and the Central Contractor Registration under CAGE Code 56540. The Company is also certified to ISO9001, AS 9100 Rev C and is fully ITAR/EAR Compliant.
