

Electronic Manufacturing and Repair

Fast development and exceptionally competitive pricing for mission critical avionic systems and components.

AAMSI provides electronic component development, manufacture and repair service to government agencies as well as OEMs in the US and International Defense and Aerospace marketplace. Products include cables, boards and boxes.

We are recognized as a reliable resource for the repair of aerospace components and critical part replenishment.

Our products include; Transponders, Control Units, Amplifiers, Receivers, Transmitters, Indicators, RF Modules, Power Supplies, Circuit Boards and Cables.

AAMSI is licensed by Lockheed Martin and approved by Northrop Grumman Corporation, to manufacture and repair state-of-the-art and legacy electronic systems including IFF systems.

Adept at fast development, AAMSI offers exceptionally competitive pricing for unique custom components and non-standard configurations.

We listen to customers, understand their requirements and appreciate their confidence. Custom designs match exact specifications and exceed expectations.

A proven ability to combine and tightly integrate concurrent engineering disciplines is key to successful component functionality. Often, our system solutions result from a smart assimilation of proven miniaturized components and modules.
