

AAMSI Engineering & Technical Teams Undergo Training to Further Machine Shop Capabilities

11/4/2016

FORT LAUDERDALE, Fla. -- AAMSI's Aerospace Engineering and Technical teams recently underwent Loft & Surfacing Data training conducted by Central Georgia Technical College (CGTC). Dennis Zalupski, President & CEO of AAMSI said, "The staff from CGTC in Warner Robbins, GA administered a thorough and well planned Loft Data and Aircraft Coordinate System Program, giving our Engineering and Manufacturing Team the knowledge and edge needed to compete today at a much higher level in the Aerospace Component Manufacturing Industry". The training included the use of Aircraft Coordinate Systems and Locating Detail Parts as well as the Extraction of Loft and Surfacing Information from blueprints for the construction of SolidWorks 3D models.

About AAMSI

Established in 1953, AAMSI (Associated Aircraft Manufacturing & Sales, Inc.) is a Small Business that has built a strong reputation within the global Aerospace and Defense Aviation Industries with its engineering, aerospace manufacturing, repair and logistics expertise for military avionics and airframe structural components. AAMSI is an established leader in the global market for IFF (Identification Friend or Foe) systems

AAMSI is licensed by the Boeing Co. to manufacture thousands of structural airframe parts used on F-15, F/A-18 and CH-47 platforms.

AAMSI is also licensed by Northrop Grumman Corporation to design, manufacture and/or repair a number of legacy electronic systems across a wide variety of military platforms. AAMSI also provides cables, boards, boxes, electronics design, manufacturing and repair of aerospace components and systems.

AAMSI has been a U.S. Department of Defense (DoD) Contractor since the mid-1970s, and is registered with the U.S. Government's Business Partner Network and the Central Contractor Registration under CAGE Code 56540. The company is also certified to ISO9001, AS9100 rev C and are fully ITAR/EAR compliant.
